

SureTrend® Cloud

Innovative Diagnostics for a Healthier World

SureTrend Cloud empowers food safety and quality managers with actionable data-driven insights necessary to make critical business decisions that reduce risk and maximize profit. It offers a robust set of dynamic dashboards to visualize environmental monitoring, quality and food safety data across multiple facilities.

The Advantages of SureTrend Cloud

Drive Organizational Insight

Visualize complex food safety test data and gain process intelligence

- Save time and focus on critical information
- Visualize testing outcomes for clear communication and action
- Store, track and trend data for program improvements

Assess Risks Easily

View trends and implement early interventions to reduce risks

- Understand risk from historical data to improve food safety programs
- Process analytical data to support quality and safety
- Confidently make data-driven decisions

Be Audit Ready

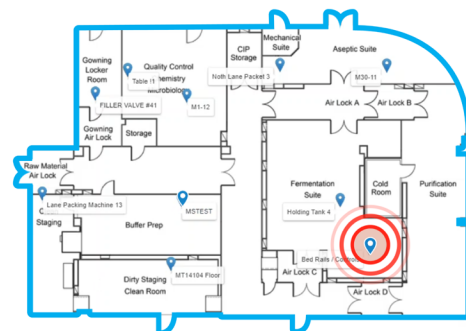

View data that is always current and available

- Quickly access secure data for audits and other compliance needs
- Simplify compliance by leveraging advanced reporting features
- Real-time data synchronization

Take data visualization to the next level with environmental maps.

Visualize test results within your site at a glance

- Upload your floor and map test results by location
- Overlay ATP test results with Indicator organism tests to discover correlations
- Simple drag-and-drop interface
- Use filters to slice and dice your view

SureTrend Packages:

 What we can offer you:	 STARTER	 POWER	 PREMIUM
	For those getting started with data trending within their facility.	For those who want to track, trend, customize, map and view data on a single facility map.	For those who want to track, trend, customize, map and view data across multiple sites.
