

QD-Loop[™]

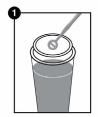

Hygiena® QD-Loop is an all-in-one device for accurate and convenient dilutions. This system allows quicker and more convenient dilutions without special lab equipment.

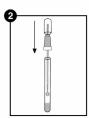

Benefits:

- All-in-one dilution system features a loop attached to 1.0 ml of buffer—just collect sample, break the SnapValve and your dilution is ready.
- Ready to pour onto dry media film or streak on an agar plate
- Multiple dilution loop options—1:100, 1:1000 dilutions
- · Aseptically filled and gamma irradiated
- No need to prepare dilution buffers
- Eliminates the need for pipettes
- Reduces labor and lab equipment expenses
- Store at refrigerated temperature (2 to 8 °C)

| Catalog No. | Description | Quantity |
|-------------|--|----------|
| QD0100 | 0.01 ml sample to deliver 1:100 dilution | 100 |
| QD1000 | 0.001 ml sample to deliver 1:1000 dilution | 100 |
