

CROSS CHECK | ACP Cooking Efficiency Test

CrossCheck is a rapid bioluminescent test that measures acid phosphatase activity, a natural enzyme present in raw meat. CrossCheck is used with finished products to verify thermal processing and on food contact surfaces to measure raw meat residues and cross contamination hazards.

Benefits:

- Results in 2-5 minutes
- 2-minute quick-test or 5-minute enhanced sensitivity test methods
- Liquid-stable chemistry eliminates the need to reconstitute a pellet, giving more accurate results with less variation
- Use directly on protein (meat, poultry, fish) to verify cooking effectiveness
- Use on food contact surfaces to measure raw meat residues and possible contamination
- Proprietary test design reduces user variation
- Pre-moistened swab breaks through biofilm and aids in sample collection
- Environmentally conscious design uses 50% less plastic than other tests
- Test devices are 100% recyclable
- 12-month shelf life at refrigerated temperature (2 - 8 °C)

Sensitivity:

- Detects to 0.1% or less of raw meat or fish
- Optional incubation for enhanced sensitivity

EnSURE™ Monitoring System

EnSURE™ is a high-sensitivity luminometer that measures multiple quality tests such as ATP, TVC, Coliform, *E. coli*, and more all on one system. The system includes SureTrend Data Analysis Software to record, trend, and analyze test results.

UltraSnap™ Surface ATP Test

UltraSnap™ measures adenosine triphosphate (ATP) found on surfaces. ATP is found in organic matter from all living organisms and should be significantly reduced after cleaning. Monitoring ATP provides an instant and objective measurement of cleaning efficiency.

PRO-Clean™ Protein Residue Test

PRO-Clean™ detects protein residues left on a surface after cleaning, delivering results in 1-10 minutes with no required instrumentation. If protein residue is present, the reagent will turn purple.

MicroSnap™ Indicator Organisms Test Kits

MicroSnap™ is a rapid test platform for detection and enumeration of specific bacteria offering same day or shift results. MicroSnap is available in four formats: Coliform, *E. coli*, Total, and Enterobacteriaceae.
