

Resuspension Reagent Ready Reference Guide

Revision A, December 2023

Product No. KIT230010

The Resuspension Reagent is designed for the suspension of microbes in combination with the foodproof[®] StarPrep[®] Two Kit. The Reagent eliminates the need for hazardous organic extractions or chaotropic agents.

KIT CONTENTS

- ▶ 1 container with 35 mL Resuspension Reagent

PROTOCOL

The Resuspension Reagent should be used in combination with the foodproof StarPrep Two Kit to provide the rapid preparation of DNA from samples for direct use in PCR.
