

InSite® | *Salmonella*

Hygiena® InSite® *Salmonella* is a quick and easy test for the detection of *Salmonella* species in food processing environments. The test contains a liquid medium formulated with growth enhancers and chromogenic compounds selective for *Salmonella* species.

Benefits:

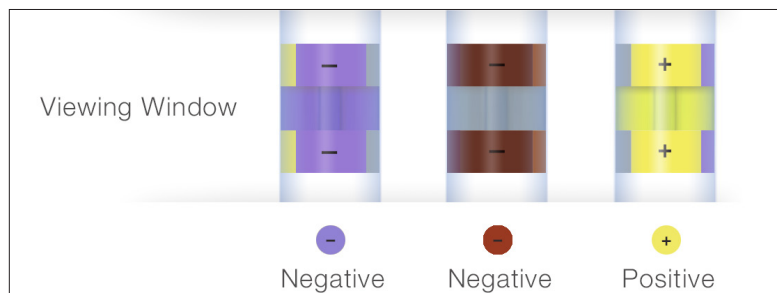

- Easy to use with no preparation steps required
- Large sponge tip maximizes sample collection for accurate results
- Eliminates costly outside lab fees for an equivalent test
- Color results are easy to interpret – bright yellow indicates presence of *Salmonella* species
- Presumptive positive results in as little as 24 hours
- Negative results in 48 hours
- Self-contained tube eliminates risk of contamination, makes testing easier, faster, and more cost-effective

Sensitivity:

- Detects *Salmonella* species down to <10 CFU, even in the presence of high numbers of competing organisms

Interpretation:

- InSite *Salmonella* features a viewing window with a result chart for easy interpretation. Results are presumptive positive when the InSite *Salmonella* media turns bright yellow.

Digital Dry Block Incubators

Digital incubators are capable of up to 105 °C and flexible for any Hygiena test device. Available in two sizes.

InSite® *Listeria* Environmental *Listeria* Species Test

InSite *Listeria* is a quick and easy test for the detection of *Listeria* species in 24-48 hours. The test contains a liquid media formulated with selective agents, growth enhancers, and color changing compounds specific to the growth of *Listeria* species.

MicroSnap® Coliform & *E. coli*

MicroSnap Coliform & *E. coli* are rapid tests for detection and enumeration of Coliform bacteria. Single figure organism numbers can be detected in the same day.

MicroSnap® Total

MicroSnap Total delivers total viable count (TVC) results in the same day.

MicroSnap® EB

MicroSnap EB delivers results in the same day.

BAX® System Instruments

The BAX System harnesses the power of DNA-based foodborne pathogen detection to help you make product decisions with confidence. An extensive assay portfolio, multiple platforms, and flexible protocols enable food labs of any size to take advantage of this benchmark technology.
