Biomass ATP Kit

The Hygiena® Biomass Kit is a high-precision test for measuring total and free ATP in liquid samples, offering expanded flexibility over all-in-one AquaSnap® Water ATP test devices.

Benefits:

- Detects microbial and non-microbial contamination
- Uses patented liquid-stable reagent for better accuracy and reproducibility
- Enables cleanup with high-quenching particulates or fibers in aqueous samples
- 12 month shelf-life at refrigerated temperature (2 to 8 °C)
- ATP standard for reagent activity testing
- Includes ATP standard for reagent activity testing and 100 cuvettes

Additional Requirements:

- Luminometer (EnSURE® Touch or SystemSURE *Plus*®)
- Hold-Rite applicator (HR002)
- Pipette and ATP free tips
- 100 µL sample volume

Product No.	Description	Quantity
CCK-4	Biomass Kit for Hygiena EnSURE Touch and SystemSURE *Plus* luminometers	1 kit
HR002	Hold-Rite Applicator	1
